FLATLITE Demonstration Kit Accessories Order Form

The following accessories are available to make demonstration of the FLATLITE samples easy to do.

COLOR OVERLAYS:

A swatch of each of the standard 6 Color Overlay's laminated together. This can be used to show the colors by placing the sample over any of the lamp pieces. Each color overlay is a 1" x 3" (2.5x7.5cm) piece laminated into a single 3" x 7" (7.5x18cm) package.

Color Swatch of each overlay	DMO-CLR-OVL	\$3.00 Each	Total QTY _____
------------------------------	-------------	-------------	-----------------

INPUT DC POWER:

Medium & Large Demo Kits run from 12VDC power which can be provided in a number of ways. The inverter in each kit comes equipped with a 2.1mm DC power jack which is one of the most common worldwide.

The most common source of power is a **wall adaptor** to take AC Mains voltage (120VAC or 240VAC) and convert it to 12VDC. Adaptors are easy to find in any electronics store in any country. Make sure you pick a unit with the appropriate output power (500 milliamps for Medium kits and 1000 milliamps for the Large kits). E-Lite makes available the following adaptors for North American plug types.

120VAC to 12VDC - 500 mA	ADP-12vdc-500ma	\$15.00 Each	Total QTY _____
120VAC to 12VDC - 1000 mA	ADP-12vdc-1000ma	\$20.00 Each	Total QTY _____

For demonstrations on the go a **Standard Cell battery pack** which holds 8 cells (AA, AAA, C or D standard cells are 1.5 volts each) can be utilized. These are available on-line or in electronic supply stores. Connections to the 2.1mm DC jack can be made to make an interchangeable system with the AC wall adaptor. E-Lite does not offer these for resale but please see the picture at the right for a sample. A web search for "8 cell battery pack" will yield plenty of results.

SETUP:

For Deluxe kits that have adjustable output, it is important to know what the operating voltage is in order to reference back to the rated maximum for FLATLITE which is 280VAC. In order to make it easy to use a standard voltmeter, E-Lite offers a Molex Test Harness that can be plugged inline with the inverter and lamp sample.

Molex Mini-Fit Test harness, Male & Female connections with alligator clips	TEST-HARN-MLX	\$15.00 Each	Total QTY _____
-----------------------------------------------------------------------------	---------------	--------------	-----------------

SUPER DELUXE COMBO:

For those who want a complete kit that shows a wide variety of samples and offers the most flexibility at an economical price, we suggest the following: An Extra Large Deluxe kit (DMO-XL-DX) with a White Panel @ \$295; a Large Deluxe kit (DMO-LG-DX) with a Green Strip @ \$110 plus one extra White Panel (DMO-LG-LAMP) @ \$30. Add in 8 extra pieces of Medium Lamp (DMO-MD-LMP) that can be run on the Large Deluxe kit with a White strip, Green Panel and one of each of the color overlays @ \$15 each. The total price of this kit is \$540.
